

Junior ML Researcher (Vision)

At Mica you'll help advance AI to produce significant, practical outcomes for millions of women who face the risk of breast cancer every year.

Responsibilities:

- Participate in the design, implementation and evaluation of new approaches to help radiologists detect breast cancer.
- Collaborate with other researchers in the team and outside of it.
- Communicate with stakeholders to transform research into a viable product.

We value:

- Creative approach
- Focused execution
- Clear communication
- Collaboration and positive energy

Qualifications:

- Experience implementing and evaluating DL / ML / AI (vision) models.
- Experience planning, executing and evaluating research.
- Experience in working in a team.
- Academic excellence or equivalent experience.

Preferred (any of):

- Experience in non-rigid registration.
- Experience with applying AI to 3D spaces.
- Experience with generating synthetic vision data.
